

CARMEL CONVENT SR. SECONDARY SCHOOL, BHEL

MATHS CLUB ACTIVITY REPORT 2024-25

Name of Activity : Mental Puzzle solving
Name of Club : Maths Club
Activity Incharges : Ms. Sarada Iyer & Ms. Arshdeep Kaur
Activity Date : 6th November 2024
Class : IXth
Activity Location : Classrooms
Time/Period : Maths period

Puzzles and games are tools that train us how to solve life's problems and can improve the mental function of an individual. Working on a puzzle reinforces the connection between the brain cells, improves mental speed and is an effective way to improve our memory. It's the thought process and the uniqueness behind the thinking which comes into play in the long run while solving Maths puzzles.

Children actively participated in solving puzzles which helped them to improve their ability to recognize patterns, create meaning, making it more engaging and memorable. Mental maths games challenge students to identify number patterns and assess the most efficient methods for problem solving.

Take-away from the Activity :

- a) Improves critical thinking and logical reasoning skills.
- b) Enriched visual understanding and builds confidence.
- c) Enhance problem solving skills of the students.
- d) Building the cognitive development of children.

Regards

Sarada Iyer
